## TECHNICAL EXPERIENCE

### Projects

- Magic Mouse <https://goo.gl/jFBFTz> **Current (Group Project)**  
Connect an Android Phone to a Windows PC and move it on a surface like a regular mouse. Available on GitHub.
- WatBalance <https://goo.gl/d6DaVv> **December 2015**  
Android app that checks balance in our University's Electronic ID Card (WatCard). Creates daily limits, graphs monthly usage, creates charts for data and records transactions. Available on Play Store and GitHub.
- W8A <https://goo.gl/2Oalv5> **November 2014**  
Developed a proof-of-concept for the Android app "DriveDroid". This technique allowed users to carry a complete Windows Installation on their phone. The user can plug in their phone into any PC and switch to their own Windows OS with their own files and applications.

### Languages

C++, C, Java, Racket, SQL, HTML/CSS, Shell Scripting and VBA

### Frameworks/Libraries

HelloCharts, Jsoup, Volley, JodaTime, Apache Commons, Android Support Libraries

## MISCELLANEOUS

### Volunteer Work

- Hack the North (October 2015)** - Conducted floor patrols, resolved grievances, assisted developers and set up Company Rooms.
- Student Blogger for University (September 2015 – Present)**

**Scholarships : University of Waterloo President's Scholarship (\$2000) on admission**
